

# MINI GOLF SCULPTURES

---

April  
**3**  
2018

← Visible seam

← Why do the teeth stop?

could be executed in a cooler way

The mane looks cool, but it gets weird around the ribs. almost as if 2 different sculptors worked on it?

these could be groupings of fake rock that would create an environment rather than just the paver borders

6

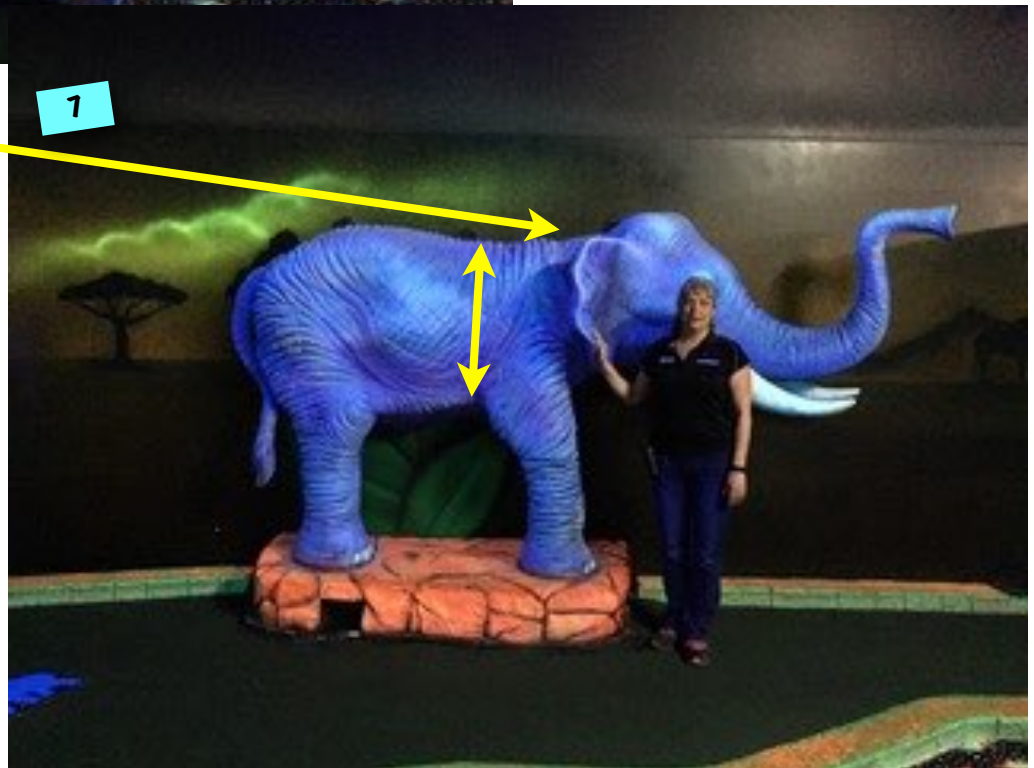

the tree behind the giraffes looks out of place. we understand that its for structure. The leaves look like a poncho that the giraffe is wearing.

7

the neck is too long and he's too skinny from his back to his belly

The wrinkles are too deep, they look almost like stripes

weird transition

strange looking foliage

the gnomes is standing very stiff like he's "posing"

same with this guy

this guy has the "movement" in his pose

**This rhino doesn't make any sense visually. His arms are way out of proportion. it is un natural to the eye**

What are these supposed to represent? bubbles? smoke?

rather than being a sculpture sitting on a plywood box, this could be all one sculpture. Maybe with stacked stones and the little house on top.

?

this unicorn needs more life

these frogs are cool.
